SUMMARY

AI-driven operations professional with a Master's in Business Analytics and a PGDM in Marketing, Operations & Analytics, bringing 3+ years of hands-on experience in automation, ETL-integrated data pipelines, and AI-driven workflows (2020-present). Daily, production-level proficiency with Claude (Code, Cowork, MCP) and Gemini (AI Studio, Vertex AI) for data analysis, reporting, process optimization, and system integration. Built and shipped a retail demand-forecasting platform (RetailLens) across 1M+ SKU-level transactions, giving direct, practical grounding in retail operations. Skilled at conducting strategy analysis, generating AI-enabled insights from multiple data sources, and translating findings into data-driven recommendations for non-technical stakeholders in fast-paced, cross-functional environments.

CORE COMPETENCIES

- **AI-Driven Automation:** Automating data extraction and reporting with Claude and Gemini to produce actionable data for strategic decision-making.
- **ETL & Data Integration:** Building AI-enabled workflows that integrate multiple data sources (Salesforce, Databricks, SQL Server) into ETL streams.
- **Content Distribution:** Developing and distributing campaign content through AI-enhanced platforms to optimize reach and engagement.
- **AI-Enabled Insights:** Generating insights from varied data sources (Census, FRED, CRM, product/sales data) to drive data-driven decisions.
- **Strategy & Market Analysis:** Leveraging AI tools to evaluate market trends across 13+ industries and recommend data-driven solutions.
- **Retail Operations:** Built RetailLens, a per-SKU demand-forecasting platform on 1M+ retail transactions (XGBoost, LightGBM).
- **KPI Reporting & AI Analytics:** Automated KPI dashboards and performance analysis using AI-assisted reporting tools.
- **Cross-Functional Leadership & Project Management:** Led builds end to end as founder/CEO-CTO across concurrent product ventures; Agile delivery experience at Deloitte.

SKILLS

AI & ML: Multi-Agent Systems, Agentic AI, GenAI, LLMs, NLP, ANNs, CNNs, RNNs, Computer Vision, RAG, HITL, Prompt Engineering (Reasoning Models), MCP, LangChain, LangGraph, Flowise, LangFlow, Google Agent Developer Kit (ADK), Vertex AI Agent Designer, Dialogflow-CX, MLOps, PyTorch, TensorFlow, HuggingFace Transformers, XGBoost, LSTM, LightGBM, KNN, Clustering, Cross Validation, PCA, Data Mining, Semantic Analysis, Sentiment Analysis, Text Mining, full CRISP-DM model development, Serverless and Online API ML systems, Predictive Modeling, Intelligent Process Automation, AI-Driven Workflow Automation, AI-Enabled Insight Generation.

AI Tools & Models: Claude (Pro, Cowork, Code, MCP, Skills, Connectors), Gemini (Pro, Colab, AI Studio, Firebase, NotebookLM), ChatGPT (Codex, Custom GPTs), Microsoft Copilot, GitHub Copilot, Cursor, Embeddings (OpenAI, Ollama, HuggingFace, Upstash), Meta, AI-assisted software development.

Cloud & DevOps: AWS (Solutions Architect Associate in progress), Google Cloud Platform (GCP), Azure (Cloud, AI Foundry, Serverless Deployments, Microsoft Graph API, OAuth 2.0 / MSAL), Vertex AI, Looker, OpenRouter, Docker, Kubernetes, serverless and online server models, REST and RESTful APIs, FastAPI, ETL and CI/CD pipelines, System Integration, Git, GitHub, VS Code, Android Studio.

Programming Languages: Python, JavaScript, Java, React, Angular, Node.js (npm), C#, R, Rust, SQL, JSON, .NET MAUI. Strong on data structures, algorithms, debugging, design patterns, and testing.

Data & Analytics: Advanced SQL (multi-source), Excel (VBA, pivot tables, power pivots, array functions), Tableau, Power BI, Streamlit, Looker, IBM SPSS 25, Figma, Databricks, SQL Server, MongoDB, PostgreSQL (Supabase), customer segmentation, A/B and test-and-learn experimentation, behavioral analytics, statistical analysis, Salesforce (CRM, Analytics, HubSpot, Lightning, Admin), Predictive Analytics, Automated Reporting Pipelines, KPI Reporting, AI Analytics.

Business & Strategy: Competitive Intelligence, Market Trend Analysis, Retail Operations, Financial Services, Healthcare Policy Analytics, Nonprofit/Donor Analytics, Real Estate, Market Research, Sales Strategy, Marketing Analytics, Content Distribution, Storytelling, Agile, Cross-functional Leadership, Project Management, Stakeholder Management, Process Optimization, Operational Efficiency.

WORK EXPERIENCE

Marketing Analytics & Donor Acquisition Associate

Addison Promotions, Dallas, TX | Aug 2026 to Present

- Automate data extraction and reporting using AI-driven tools (Claude, Gemini) to provide actionable data for strategic, donor-acquisition decision-making.
- Develop AI-enabled workflows integrating donor/CRM data sources with ETL streams, automating touchpoint tracking and conversion-funnel attribution.

- Develop and distribute campaign content through AI-enhanced channels to optimize outreach reach and engagement for nonprofit clients.
- Build automated KPI dashboards (donor retention, ROI per campaign, acquisition cost) and apply AI analytics to performance reporting; design A/B testing frameworks to optimize campaign results.

Analytics Advisor & Channel Partner

Rebridz Realtors LLP, Hyderabad, India | Aug 2020 to Nov 2023

- Engineered end-to-end, AI-enabled, automated data workflows across Salesforce, Databricks, and SQL Server, integrating multiple data sources with ETL pipelines to drive portfolio decisions.
- Conducted strategy and market trend analysis using data-driven tools, applying clustering-based segmentation and test-and-learn experimentation to recommend data-driven solutions; sustained a 17% client retention rate.
- Generated AI-enabled insights from spatial, proximity, and trend-detection data to surface market opportunities and presented findings to non-technical stakeholders.

Market Development Analyst – Cross Program *Deloitte, Hyderabad, India | May 2019 to Aug 2020*

- Built Tableau and Salesforce dashboards and competitive intelligence supporting C-suite tracking across 50+ enterprise client accounts in an Agile, cross-functional, fast-paced environment; earned 2x corporate Spot Awards.
- Translated complex data into clear, actionable recommendations for non-technical C-suite stakeholders, demonstrating strong communication and project management skills.

RELEVANT PROJECTS

- **Inventory Demand Forecaster, RetailLens (MS Capstone)** (Python, PyQt6, XGBoost, LightGBM): Retail operations project forecasting per-SKU demand on UCI Online Retail II (1M+ transactions); final XGBoost MAE 44.80. Direct, hands-on retail operations and demand-planning experience.
- **Business Viability Analyzer** (Python, Data.gov): Automates market sizing, competitive mapping, and strategy/risk analysis across 13+ industries in under 60 seconds, evaluating market trends to recommend data-driven solutions.
- **Filterflow AI** (Python, GCP, Google Agent Developer Kit, Docker): Open-source multi-agent framework that turns conversational workflows into containerized, deployable ETL/data pipelines, integrating varied data sources.
- **EmailScan AI** (Python, FastAPI, Microsoft Graph API, Azure AI Foundry, OAuth 2.0 / MSAL): AI-driven automation agent integrating with Outlook via Graph API; generates AI-enabled, explainable insights and routes actions (Report, Delete, one-click Unsubscribe) through a safety-gated workflow.
- **PolicyIQ** (Python, Streamlit, Claude, FastAPI): Generates AI-enabled insights from payer policy data, translating it into plain-language guidance and flagging claim denial risk before submission.
- **Insurance Risk Analyzer** (Python, PyQt6, ReportLab): Automated KPI dashboards and reporting with live Census/FRED API integration for risk and performance analysis.

EDUCATION

University of North Texas, Denton, TX: M.S., Business Analytics; conferral May 2026.

Siva Sivani Institute of Management, Hyderabad, India: PGDM, Marketing, Operations & Analytics.

Bhavan's Vivekananda Degree College, Hyderabad, India: B.S., Statistics.

CERTIFICATIONS

Cloud: AWS Certified Solutions Architect, Associate (in progress, expected before July 2026); Google Cloud Platform; Google Application Development; Google Generative AI.

Other: IBM Machine Learning in Python; IBM SPSS 25.

RESEARCH & PUBLICATION

Rethinking Reproducibility: A Study on IoT-based Malware Detection, UNT (Research Fellow, May to Jul 2025). Poster presented at ABIS/FBD 2026. Trained ANNs for classification using PyTorch and TensorFlow.

AWARDS

- Best Student Research Paper Award, National-level competition, Dr. D. Y. Patil Institute of Management Studies (2019), for “A Study on the Influence of Select Online Mobile Games towards Consumer Satisfaction.”
- Deloitte: Spot Award x2 (DU Strategy & Competitive Landscape); Firm-Wide Award (Top 7 Inclusive Persons of Deloitte).
