PROFESSIONAL SUMMARY

Original thinker merging business acumen with deep tech. Transitioned from leading marketing analytics & Sales to mastering Agentic AI, GenAI, and Machine Learning. Seeking to architect solutions combining advanced coding and commercial strategy for massive organizational impact. Currently building tailored analytical business models from public data as pre-grad projects using AI.

TECHNICAL SKILLS

- **AI & ML:** Agentic AI, GenAI, LLMs, Machine Learning, HITL, Prompt Engineering, LangChain, Flowise, OpenAI, Vertex AI, Dialogflow CX, AI Studio, ETL Pipelines.
- **Dev, Cloud & Architecture:** Python, JavaScript, Rust, C#, JSON, Docker, .NET MAUI, GitHub, System Architecture Designs, Digital Logic, GCP, VS Code, Android Studio, Expo.
- **Data & Analytics:** Tableau, Power BI, SQL Server, MongoDB, IBM SPSS 25, Figma, Data Visualization, Market Analytics.
- **Business & Strategy:** Competitive Intelligence, Market Research, Sales Strategy, Dashboards, Agile, Cross-functional Leadership, Adaptability, Stakeholder Management.

EDUCATION

M.S., Business Analytics | University of North Texas, Denton, TX | Exp Grad Date: May 2026 | GPA: ~3.5

PGDM (Marketing, Ops & Analytics) | Siva Sivani Institute of Management, India | Apr 2019

B.S., Statistics | Bhavan's Vivekananda Degree College, India | May 2016

EXPERIENCE

Deloitte | Hyderabad, India

Market Development – Cross Program Analyst | May 2019 – Aug 2020

- Analyzed complex market data to generate competitive intelligence, translating multi-level data into scalable strategic solutions.
- Developed interactive dashboards and managed Salesforce pipelines to deliver actionable insights for the Client Accelerator Team.
- Built Tableau/Power Bi visualizations with data teams, synthesizing BoardEx data for C-suite tracking across 50+ enterprise clients.

Rebridz Realtors LLP | Hyderabad, India

Channel Partner & Analytics Advisor | Aug 2020 – Nov 2023

- Directed quantitative analytics and market forecasting, driving \$4.75M USD (approx. INR) in portfolio sales and securing \$1.78M USD (approx. INR) in REIT allocations.
- Optimized lead conversion funnels using customer data metrics, sustaining a 17% client retention rate via targeted lifecycle management.
- Executed spatial data evaluation (proximity analysis) and trend surveys to map market opportunities and reactivate dormant client segments.

INTERNSHIPS:

- **UNT AI/CS Summer Research Program:** Research fellow – Rethinking Reproducibility: A Study on IoT based Malware Detection.
- **Amazon:** May 2017 – Aug 2017; Role: Alexa Data Services – Data Associate.
- **ICICI Direct:** May 2018 – Jul 2018; Role: Financial Advising – Customer Relationships.

AWARDS & CERTIFICATIONS:

- Best Student Research Paper Award at a National level competition held at Dr. D. Y. Patil Institute of Management Studies
- Deloitte: Spot Award x2 – DU Strategy & Competitive Landscape & Firm Wide Award – One of Top 7 Inclusive persons of Deloitte
- Machine Learning in Python: IBM Certified.
- IIM Red Brick Summit – 2017 workshops: Amazon's Ops Mgmt.; Market Research; Game Theory; Motilal Oswal's Pick Your Stock.
- IBM SPSS 25 – Siva Sivani Institute of Management – 2018.

PROJECTS & ANALYTICAL MODELS

Open-Source Deployments: Developed "**Filterflow AI**" (a multi-agent system using GCP and ADK) and a custom Adobe Express Add-on, with full documentation and active codebases hosted on GitHub (repo: <https://github.com/VikramAdityaTheKing>).

Customized Analytical Business Model Projects: (For Disclosure: reach out to me on LinkedIn or email for a Demo)

- **Business Viability Analyzer:** Engineered a predictive model leveraging Data.gov datasets to generate actionable business intelligence and location viability metrics for 13+ industries, optimizing planning for data centers and franchises.
- **Insurance Risk Analyzer:** Developing a dual-purpose risk assessment and competitive intelligence model tailored for major market players in the auto and business insurance sectors.
- **Localyst AI:** Architected an advanced ETL pipeline utilizing Python, Agentic AI, and transformers to maximize document, text, APIs and URL based computer vision capabilities for extracting complex data from large-scale files (>20MB) and works offline.
