SUMMARY

Original thinker merging business acumen with deep tech. Transitioned from leading marketing analytics & sales strategy to mastering Agentic AI, GenAI, and Machine Learning. Seeking to architect solutions combining advanced coding and commercial strategy for massive organizational impact.

WORK EXPERIENCE

Deloitte

Hyderabad, India

Market Development – Cross Program Analyst

May 2019 - Aug 2020

- Analyzed complex market data to generate competitive intelligence, translating data science into scalable strategic solutions.
- Developed interactive dashboards & managed Salesforce CRM pipelines to deliver actionable insights for the Client Accelerators.
- Built and presented data visualizations, intelligence that makes impact, supporting C-suite tracking across 50+ enterprise clients.

Rebridz Realtors LLP

Hyderabad, India

Channel Partner & Analytics Advisor

Aug 2020 - Nov 2023

- Directed quantitative analytics and market forecasting to influence sales strategy, driving \$4.75M USD (approx. INR) in portfolio sales and securing \$1.78M USD (approx. INR) in REIT allocations.
- Optimized lead conversion funnels using customer data metrics, sustaining a 17% client retention rate via targeted lifecycle management using Salesforces CRM/Analytics and Databricks.
- Executed spatial data evaluation (proximity analysis) and trend surveys to tap into white space market opportunities, finding anomalies and root-cause analysis and reactivate dormant client segments.

University of North Texas

Research fellow (Internship)

Rethinking Reproducibility: A Study on IoT based Malware Detection.

May 2025 -

Jul 2025

Amazon

Data Associate (Internship)

May 2017 - Aug 2017

ICICI Direct

Financial Advising - Customer Relationships (Internship)

May 2018 - Jul 2018

University of North Texas | Denton, TX

M.S., Business Analytics

Siva Sivani Institute of Management | India

PGDM, Marketing, Ops & Analytics

Bhavan's Vivekananda Degree College | India

B.S., Statistics

CERTIFICATIONS

Cloud Platform, Application Development & GenAI

Google

Machine Learning in Python

IBM

IBM SPSS 25

Siva Sivani Institute of Management

SKILLS

AI & ML: Agentic AI, GenAI, LLMs, NLP, ANNs, CNNs, RNNs, Computer Vision, RAG, Multi-Agent Systems, Custom GPTs, HITL, Prompt Engineering, Flowise, LangFlow, MLOps, LangChain, Python, JavaScript, Rust, R, C#, JSON, .NET MAUI, ETL & CI/CD pipelines, Offline ML Systems & Software

Dev & Cloud: Google Cloud Platform (GCP), Vertex AI, Dialogflow-CX agents suite, Looker (Google data), Google AI Studio, Open-AI, Open-router, APIs, RESTful APIs, GitHub, Copilot, MS Visual Studio Code, Android Studio, Docker & Kubernetes, Expo for IOS apps

Data & Analytics: Tableau, Excel, Power BI, IBM SPSS 25, Figma, Salesforce (CRM/Analytics), Databricks, MongoDB, SQL Server

Business & Strategy: Competitive Intelligence, Financial Services, Real Estate, Market Research, Sales Strategy, Marketing Analytics, Storytelling, Agile, Cross-functional Leadership, Adaptability, Stakeholder, People & Content Management

AWARDS

- Best Student Research Paper Award at a National level competition held at Dr. D. Y. Patil Institute of Management Studies
- Deloitte: Spot Award x2 - DU Strategy & Competitive Landscape & Firm Wide Award - One of Top 7 Inclusive persons of Deloitte
- IIM Red Brick Summit - 2017 workshops: Amazon's Ops Mgmt.; Market Research; Game Theory; Motilal Oswal's Pick Your Stock.

PROJECTS & ANALYTICAL MODELS

- Open-Source Deployments: Developed "Filterflow AI" (a multi-agent system using GCP and ADK) and Profash a custom Adobe Express Add-on, with full documentation and active codebases hosted on GitHub (repo: <https://github.com/VikramAdityaTheKing/>).
- Business Viability Analyzer: Engineered a predictive model leveraging Data.gov datasets to generate actionable business intelligence and location viability metrics for 13+ industries, optimizing planning for data centers and franchises.
- Localyst AI: Architected an advanced ETL pipeline utilizing Python, Agentic AI, and transformers to maximize document, text, APIs and URL based computer vision capabilities for extracting complex data from large-scale files (>20MB) and works offline.
- Insurance Risk Analyzer: Developing a dual-purpose risk assessment & competitive intelligence model tailored for major market players in the auto and location insurance sectors & Many more. Scan the QR code below to learn more:
